Author index

Allen, J.F., see Mullineaux, C.W. (934) 96
Allen, J.F., see Sanders, C.E. (934) 87
Allison, W.S., see Bullough, D.A. (934) 397
Altvater-Mackensen, R. and Strotmann, H.
Contents of endogenous adenine nucleotides and ATPase activity of isolated whole chloroplasts (934) 213
Arrio-Dupont, M. and Danièle de Nay,
High-energy phosphates in quiescent, beating and contracted cardiac cells (934) 264
Augustin, W., see Wiswedel, I. (934) 80

Baker, N.R., see Bredenkamp, G.J. (934) 14
Barber, J., see Giardi, M.T. (934) 64
Barber, J., see Kühlbrandt, W. (934) 118
Beattie, D.S., see Zhu, Q.-s. (934) 303
Böger, P., see Häfele, U. (934) 186
Boxer, S.G., see Goldstein, R.A. (934) 253
Braslavsky, S.E., see Nitsch, C. (934) 201
Bredenkamp, G.J. and Baker, N.R.
The changing contribution of LHC I to Photosystem I activity during chloroplast biogenesis in wheat (934) 14
Bromidge, E.S., see McCormack, J.G. (934) 282
Bryl, K., see Váró, G. (934) 247
Büchel, C., see Wilhelm, C. (934) 220
Bullough, D.A. and Allison, W.S.
Inactivation of the F_1-ATPase from the thermophilic bacterium PS3 by 5′-*p*-fluorosulfonylbenzoylinosine at 65 °C is accompanied by modification of β-tyrosine-364 (934) 397

Che, C.M., see Cho, K.C. (934) 161
Cho, K.C., Chu, W.F., Choy, C.L. and Che, C.M.
Kinetics of electron transfer between cytochrome *c* and iron hexacyanides. Evidence for two electron-transfer sites (934) 161
Choquet, Y., De Vitry, C., Delepelaire, P., Wollman, F.A. and Tapie, P.
Spectroscopic characterization of the Photosystem II chlorophyll-protein complexes (934) 389
Choy, C.L., see Cho, K.C. (934) 161
Chu, W.F., see Cho, K.C. (934) 161
Cotton, T.M., see Seibert, M. (934) 235
Csatorday, K., see MacColl, R. (934) 275

Danièle de Nay, , see Arrio-Dupont, M. (934) 264
Dau, H. and Hansen, U.-P.
The involvement of spillover changes in State 1-State 2 transitions in intact leaves at low light intensities (934) 156
Dawes, N.J., see McCormack, J.G. (934) 282
De Kouchkovsky, F., see Sigalat, C. (934) 375
De Kouchkovsky, Y., see Sigalat, C. (934) 375
Delepelaire, P., see Choquet, Y. (934) 389
Dennenberg, R.J., see Jursinic, P.A. (934) 177
De Vitry, C., see Choquet, Y. (934) 389
De Vitry, C., see Diner, B.A. (934) 47
Diner, B.A., De Vitry, C. and Popot, J.-L.
Quinone exchange in the Q_A binding site of Photosystem II reaction center core preparations isolated from *Chlamydomonas reinhardtii* (934) 47
Droux, M., see Hirasawa, M. (934) 169
Durgaryan, S.S., see Khachatryan, A.Z. (934) 191

Eckerskorn, C., see Gabellini, N. (934) 227

Feher, G., see McPherson, P.H. (934) 348
Frank, H.A., see Robert, B. (934) 401

Gabellini, N., Gao, Z., Eckerskorn, C., Lottspeich, F. and Oesterhelt, D.
Purification of the H^+-ATPase from *Rhodobacter capsulatus*, identification of the F_1F_0 components and reconstitution of the active enzyme (934) 227
Gao, Z., see Gabellini, N. (934) 227
Garlaschi, F.M., see Zucchelli, G. (934) 144
Giardi, M.T., Marder, J.B. and Barber, J.
Herbicide binding to the isolated Photosystem II reaction centre (934) 64
Gillbro, T., Sandström, Å., Spangfort, M., Sundström, V. and Van Grondelle, R.
Excitation energy annihilation in aggregates of chlorophyll *a*/*b* complexes (934) 369
Glick, R.E. and Melis, A.
Minimum photosynthetic unit size in System I and System II of barley chloroplasts (934) 151
Godinot, C., see Moradi-Améli, M. (934) 269
Goldstein, R.A., Takiff, L. and Boxer, S.G.
Energetics of initial charge separation in bacterial photosynthesis: the triplet decay rate in very high magnetic fields (934) 253
Guard-Friar, D., see MacColl, R. (934) 275
Guenther, J.E., Nemson, J.A. and Melis, A.
Photosystem stoichiometry and chlorophyll antenna size in *Dunaliella salina* (green algae) (934) 108

Häfele, U., Scherer, S. and Böger, P.
Cytochrome aa_3 from heterocysts of the cyanobacterium *Anabaena variabilis*: isolation and spectral characterization (934) 186

Hansen, U.-P., see Dau, H. (934) 156
Haraux, F., see Sigalat, C. (934) 375
Hirasawa, M., Sung, J.-D., Malkin, R., Zilber, A., Droux, M. and Knaff, D.B.
Evidence for the presence of a [2Fe-2S] ferredoxin in bean sprouts (934) 169
Homann, P.H.
The chloride and calcium requirement of photosynthetic water oxidation: effects of pH (934) 1
Horton, P., see Oxborough, K. (934) 135
Howlett, B., see Wei, J.-m. (934) 72

Ikegami, I. and Itoh, S.
Absorption spectroscopy of P-700-enriched particles isolated from spinach. Is P-700 a dimer or a monomer? (934) 39
Itoh, S. and Iwaki, M.
Delayed fluorescence in Photosystem I enhanced by phylloquinone (vitamin K-1) extraction with ether (934) 32
Itoh, S., see Ikegami, I. (934) 39
Iwaki, M., see Itoh, S. (934) 32

Jagendorf, A.T., see Wei, J.-m. (934) 72
Jennings, R.C., see Zucchelli, G. (934) 144
Jursinic, P.A. and Dennenberg, R.J.
Enhanced oxygen yields caused by double turnovers of Photosystem II induced by dichlorobenzoquinone (934) 177

Khachatryan, A.Z., Durgaryan, S.S. and Martirosov, S.M.
The constitutive K^+ pump in *Serratia marcescens* (934) 191
Khlopkov, V., see Pisarenko, O. (934) 55
Knaff, D.B., see Hirasawa, M. (934) 169
Kühlbrandt, W. and Barber, J.
Separation of phosphorylated and unphosphorylated light-harvesting chlorophyll *a/b*-protein complex by column chromatography (934) 118

Lottspeich, F., see Gabellini, N. (934) 227

MacColl, R., Guard-Friar, D., Ryan, T.J., Csatorday, K. and Wu, P.
The route of exciton migration in phycocyanin 612 (934) 275
Malkin, R., see Hirasawa, M. (934) 169
Marder, J.B., see Giardi, M.T. (934) 64
Maróti, P. and Wraight, C.A.
Flash-induced H^+ binding by bacterial photosynthetic reaction centers: comparison of spectrophotometric and conductimetric methods (934) 314
Maróti, P. and Wraight, C.A.
Flash-induced H^+ binding by bacterial photosynthetic reaction centers: influences of the redox states of the acceptor quinones and primary donor (934) 329
Martirosov, S.M., see Khachatryan, A.Z. (934) 191
McCormack, J.G., Bromidge, E.S. and Dawes, N.J.
Characterization of the effects of Ca^{2+} on the intramitochondrial Ca^{2+}-sensitive dehydrogenases within intact rat-kidney mitochondria (934) 282
McPherson, P.H., Okamura, M.Y. and Feher, G.
Light-induced proton uptake by photosynthetic reaction centers from *Rhodobacter sphaeroides* R-26. I. Protonation of the one-electron states $D^+Q_A^-$, DQ_A^-, $D^+Q_AQ_B^-$, and $DQ_AQ_B^-$ (934) 348
Melis, A., see Glick, R.E. (934) 151
Melis, A., see Guenther, J.E. (934) 108
Metz, J.G., see Seibert, M. (934) 235
Moradi-Améli, M. and Godinot, C.
The rotation of the α subunit of F_1 relative to minor subunits is not involved in ATP synthesis. Evidence given by using an anti-α subunit monoclonal antibody (934) 269
Mullineaux, C.W. and Allen, J.F.
Fluorescence induction transients indicate dissociation of Photosystem II from the phycobilisome during the State-2 transition in the cyanobacterium *Synechococcus* 6301 (934) 96

Nemson, J.A., see Guenther, J.E. (934) 108
Nitsch, C., Braslavsky, S.E. and Schatz, G.H.
Laser-induced optoacoustic calorimetry of primary processes in isolated Photosystem I and Photosystem II particles (934) 201

Oesterhelt, D., see Gabellini, N. (934) 227
Okamura, M.Y., see McPherson, P.H. (934) 348
Oxborough, K. and Horton, P.
A study of the regulation and function of energy-dependent quenching in pea chloroplasts (934) 135

Pick, U. and Weiss, M.
The mechanism of stimulation of photophosphorylation by amines and by nigericin (934) 22
Pisarenko, O., Studneva, I., Khlopkov, V., Solomatina, E. and Ruuge, E.
An assessment of anaerobic metabolism during ischemia and reperfusion in isolated guinea pig heart (934) 55
Popot, J.-L., see Diner, B.A. (934) 47

Robert, B. and Frank, H.A.
A resonance Raman investigation of the effect of lithium dodecyl sulfate on the B800–850 light-harvesting protein of *Rhodopseudomonas acidophila* 7750 (934) 401
Rousseau, B., see Wilhelm, C. (934) 220
Ruuge, E., see Pisarenko, O. (934) 55
Ryan, T.J., see MacColl, R. (934) 275

Sanders, C.E. and Allen, J.F.
Effects of divalent cations on 77 K fluorescence emission and on membrane protein phosphorylation in isolated thylakoids of the cyanobacterium *Synechococcus* 6301 (934) 87
Sandström, Å., see Gillbro, T. (934) 369
Schatz, G.H., see Nitsch, C. (934) 201
Scherer, S., see Häfele, U. (934) 186
Schild, L., see Wiswedel, I. (934) 80
Seibert, M., Cotton, T.M. and Metz, J.G.
Surface-enhanced Raman scattering spectroscopy: probing

the lumenal surface of Photosystem II membranes for evidence of manganese (934) 235
Sigalat, C., De Kouchkovsky, Y., Haraux, F. and De Kouchkovsky, F.
Shift from localized to delocalized protonic energy coupling in thylakoids by permeant amines (934) 375
Solomatina, E., see Pisarenko, O. (934) 55
Spangfort, M., see Gillbro, T. (934) 369
Strotmann, H., see Altvater-Mackensen, R. (934) 213
Studneva, I., see Pisarenko, O. (934) 55
Sundström, V., see Gillbro, T. (934) 369
Sung, J.-D., see Hirasawa, M. (934) 169

Takiff, L., see Goldstein, R.A. (934) 253
Tapie, P., see Choquet, Y. (934) 389
Trümper, L., see Wiswedel, I. (934) 80

Van Dam, K., see Woelders, H. (934) 123
Van der Velden, T., see Woelders, H. (934) 123
Van Gorkom, H.J., see Vos, M.H. (934) 293
Van Grondelle, R., see Gillbro, T. (934) 369
Váró, G. and Bryl, K.
Light- and dark-adaptation of bacteriorhodopsin measured by a photoelectric method (934) 247
Vos, M.H. and Van Gorkom, H.J.
Thermodynamics of electron transport in Photosystem I studied by electric field-stimulated charge recombination (934) 293

Wei, J.-m., Howlett, B. and Jagendorf, A.T.
Azide inhibition of chloroplast ATPase is prevented by a high protonmotive force (934) 72
Weiss, M., see Pick, U. (934) 22
Wilhelm, C., Büchel, C. and Rousseau, B.
The molecular organization of chlorophyll-protein complexes in the Xanthophycean alga *Pleurochloris meiringensis* (934) 220
Wiswedel, I., Trümper, L., Schild, L. and Augustin, W.
Injury of mitochondrial respiration and membrane potential during iron/ascorbate-induced peroxidation (934) 80
Woelders, H., Van der Velden, T. and Van Dam, K.
Unique relationships between the rates of oxidation and phosphorylation and the protonmotive force in rat-liver mitochondria (934) 123
Wollman, F.A., see Choquet, Y. (934) 389
Wraight, C.A., see Maróti, P. (934) 314
Wraight, C.A., see Maróti, P. (934) 329
Wu, P., see MacColl, R. (934) 275

Zhu, Q.-s. and Beattie, D.S.
The interaction of quinone analogues with wild-type and ubiquinone-deficient yeast mitochondria (934) 303
Zilber, A., see Hirasawa, M. (934) 169
Zucchelli, G., Garlaschi, F.M. and Jennings, R.C.
Influence of electrostatic screening by cations on energy coupling between Photosystem II reaction centres and the light-harvesting chlorophyll *a/b* protein complex II (934) 144
